

# Odorox® Boss™ Hydroxyl Generator Air & Surface Protection

## Product Specifications

PORTABLE

# Boss™ Hydroxyl Generator

The Boss™ hydroxyl generator is designed for larger spaces and environments that require professional cleaning (to purify and deodorize). This portable unit can be used in large offices, retail, senior living and school spaces, and in industrial applications including restoration and remediation following fire or water damage.

The table below summarizes the minimum treatment area in the absence of ventilation, and the treatment area range under typical operating conditions: 3 air changes per hour, 90% recirculated air, and 9 foot (2.7 m) ceilings. If the treated space contains a high contamination or strong odors, the effective treatment area will be smaller than the range listed below. These guidelines should be adhered to for optimal performance and safety.
